

Z15

The Z15 module, of the Z series, is a power supply module for operating A15 or A15-N oxygen sensors. A connecting cable to the sensor ensures heating and signal transmission. The second connector connects to further processing electronics. The module is designed for wall mounting.

Product highlights:

- Easy to use
- Robust construction
- Wall mounting

Application examples:

- Heat treatment systems
- Melting systems
- Soldering systems
- Welding systems
- Combustion systems

Technical data Z15

Supply voltage	230 V
Power incl. sensor	approx. 50 W
Ambient temperature	10 – 45 °C
Weight	approx. 2 Kg
Dimensions	approx. 200 x 260 x 110 mm

Combination options:

Z15:		Manual
A15	Flyer	Manual
A15-N	Flyer	Manual
